Subject:	City of Racine Water Diversion Application
Date:	Saturday, March 03, 2018 8:11:59 AM

Please DO NOT approve this application to divert water from Lake Michigan for use by Foxconn. Fresh water is our most precious resource, and that is why the Great Lakes Compact was created, to protect our fresh drinking water and preserve the lake for the environment. It may not seem like that much right now, but you must consider what breaking the pact will do for further business decisions. You will be creating a precedent for all future companies wishing to drain our precious lake. Twenty years from now, as the impact of climate change becomes apparent, our country's largest body of fresh surface water will become essential to survival. Do not allow big business and greedy politicians sell our long-term security and safety.

Thank you for your consideration.
