Invasive BMPs: <https://councilonforestry.wi.gov/Pages/InvasiveSpecies/Forestry.aspx>

2. **The stumps of all pine trees cut on this sale are to be treated with an approved product to prevent infection by heterobasidion root disease (HRD). This can be done by the contracting logger's crew if certified to apply pesticides, or a private contractor can be hired to treat the stumps as the harvest occurs, within 48 hours of being cut. Blue dye must be used with the spray mix to identify stumps that have been treated. If the stumps are being treated by hand, all reasonable efforts must be taken during the felling and skidding to keep slash off of the pine stumps to make it easier to find them and treat them. The logging crew must maintain communication with the pesticide applicator so that the applicator knows when logging is occurring, when to be on site to treat stumps, and where the cutting has occurred.**

3. This sale area is crossed by trails that are a part of the Old World Wisconsin operations.
**** Damage to these trails will not be tolerated and any damage that may occur must be repaired immediately.** The trails may be crossed by equipment as needed as long as conditions allow (frozen or dry and firm ground) but running equipment on the trails shall not occur unless permitted by the Forester.
