WI DNR,

I'm opposed to diverting Lake Michigan (L.M.) water to Mount Pleasant.

Racine intends to send water to Mount Pleasant which lies outside L.M. Water Basin.
That would Violate The Great Lakes Compact.

Southeastern Wisconsin is quickly becoming the Freshwater Technology capital of the United States.
Milwaukee Mayor, Tom Barrett, refers to the region as the "Silicon Valley of Fresh Water." This will create good jobs long into the future.

We cannot afford to be short-sighted. Wise decisions look far into the future. Fresh Water sustains life. L.M. contains 20% of the World's Fresh Water!

Respectfully,

Ms Carol Limbach
