Subject:	Objection to Racine"s Request to Draw Lake Michigan Water for FoxConn
Date:	Friday, February 02, 2018 11:11:00 AM

To Whom It May Concern:

Please accept this email as my stated objection to the proposed plan by the City of Racine to withdraw an additional 7 million gallons of water per day from Lake Michigan for purposes of meeting the needs of the proposed FoxConn facility. As I understand it, 39% of this water would not be returned to Lake Michigan or otherwise returned to the water supply. Lake Michigan already faces very serious threats to its water level, as well as to its cleanliness. The level of water use, coupled with the low amount being restored, 39%, makes this amount of additional daily draw unsustainable and a serious threat to the continued health and viability of Lake Michigan.

Thank your for considering my comments and please include them and this email as part of the record of your hearing on this matter.
