Hello, I wanted to share my personal input and passionate reaction to this proposal for access to copious amounts of water from Lake Michigan. I am disgusted and appalled that this is even being considered. Our fresh water is precious and by no means an unlimited resource. We need to protect the remaining fresh water sources while we still can. Our oceans are already contaminated beyond our control with radioactive waste that no one seems to be talking or concerned about from the Fukushima disaster nearly seven years ago. I urge you(to whom it may concern)to heed the request of many of the Great Lakes area citizens that feel very strongly about putting a stop to this proposal.

Sincerely,
Charity Ann Fritz
A highly concerned citizen.
