Initially I was for Foxconn coming in. After talking to friends in the trades and seeing the local housing market my opinion has changed. We can't fill the open jobs we have now and the housing market is strained. Now hearing about the water consumption and the pollution I am totally against it. I am from and live in Wisconsin. Foxconn coming in will drive housing cost out of sight. it will be bad for Lake Michigan and the environment of SE Wisconsin. Please keep them out and keep our beautiful state intact.
