Subject:	Deny Racine Diversion Application
Date:	Monday, March 05, 2018 7:20:12 AM

Adam Freihoefer,

The City of Racine's request for a new diversion of 7 Million gallons a day violates the intent of the Great Lakes Compact. The diversion is primarily for a private industrial use (Foxconn) rather than public ("largely residential") use as required by the Great Lakes Compact which states, "all the Water so transferred shall be used solely for Public Water Supply Purposes within the Straddling Community." The diversion application also does not provide enough detail about the quality of the water that will be returned to the City of Racine and Lake Michigan. For these reasons, the DNR should deny this application.

Things have been getting worse and worse for our water in Wisconsin and it will take many generations to get back to clean abundant water for ALL residents of Wisconsin. Please do not approve this request - it is against everything for which we stand in Wisconsin, which USED to be in the forefront of a clean environment and protection of our water.
