Re: Seven million gallons of water a day

It has come to our attention that the amount of water requested by Racine on behalf of Mount Pleasant is the same amount of water requested by Waukesha. Since the Foxconn Technology Group's planned manufacturing complex does not require potable water, have you considered returning the Waukesha water to the Foxconn complex. This would be a savings of 7 million gallons of water a day!

Since Waukesha already has permission to divert water from Lake Michigan, this would be a win-win situation.

Sincerely,

Jacqueline Allen Lichty
Wauwatosa, Wisconsin
