Please accept my comment below for the public record on the Racine diversion request

I am deeply concerned that only 60% of the 7 million gallons of water that will be diverted, primarily for use by the Foxconn company, will be returned to the Lake Michigan.

One of the main purposes of the Great Lakes Compact is to keep Lake Michigan water in Lake Michigan. Furthermore , there is a provision in the Compact that requires that the water is to be used for a public water supply. A public water supply is defined in Wisconsin statutes as a community, largely residential population, with some commercial and industrial For this reason, diverting 7 million gallons of water to Foxconn does not meet this requirement. There is no residential land use in the area where Foxconn is to be located. It is all rural.

I oppose the use of the water for Foxconn because it does not meet the standards set by the Great Lakes Compact.
