Subject: Deny Racine Diversion Application
Date: Saturday, March 10, 2018 10:07:49 AM

Dear Section Chief — Water Use Wisconsin DNR,

Please listen to the environmentalists and their reasons for denying Foxcomm's request to break the Great Lakes Compact. Degradation of our water supply (listen to what the environmentalists and community members are saying!!) will not be a gift to future generations nor to the present ones who suffer contamination problems from an industry that will be outdated most likely in the lifetime of many of us. Do not sell our inheritance for a pot of electronic bits!
The City of Racine's request for a new diversion of 7 Million gallons a day violates the intent of the Great Lakes Compact. The diversion is primarily for a private industrial use (Foxconn) rather than public ("largely residential") use as required by the Great Lakes Compact which states, "all the Water so transferred shall be used solely for Public Water Supply Purposes within the Straddling Community." The diversion application also does not provide enough detail about the quality of the water that will be returned to the City of Racine and Lake Michigan. For these reasons, the DNR should deny this application.

Sincerely,

Vivian Corres
