As a SE Wisconsin resident and taxpayer, and as a citizen that relies on Lake Michigan in innumerable ways, from drinking water to recreation, I wholeheartedly oppose Foxconn's diversion. This Lake is too valuable, too rare, too fragile, too irreplaceable, too important to allow such a risky, unchecked, and egregious diversion to occur. 7 million gallons, with 2.7 gallons of consumptive use, per day? This lake is our lifeblood. It nourishes us, feeds us, it will sustain our future generations. Please do not allow a foreign corporation to take so much and give so little back from the lake that we love so dearly.

Thank you.
