Please reject the insane Foxcon request to withdraw 7,000,000 gallons of water per day from Lake Michigan. Our water resources are far too precious to allow anyone, let alone a foreign company, to have this request granted without a solid proposal of what the water will be used for, why the quantity is necessary, and how it will be cleaned and treated afterwards to preserve the resource. Stop our legislature from further handouts to foreign corporations at huge cost to Wisconsin citizens and tax payers.

Thank you,
Mike Sam
