Subject:	No to Foxxcon pulling 7 million gallons of water per day from Lake Michigan
Date:	Friday, March 09, 2018 3:30:01 PM

To the Racine DNR

Please do not approve any requests to allow Foxconn to pull 7 million gallons of water per day from Lake Michigan. How will the water be used/polluted? Where will it go as waste? Will it go back into Lake Michigan? Of course it will! This is unconscionable. I urge you to consider the health of our fresh water resources as a top priority in all you decision-making. We cannot have a healthy planet without constant vigilance over steps that lead to pollution and extinction.

No job is worth the degradation of our planet.
