Subject: Say NO to Diversion of Lake Michigan water for Foxconn
Date: Wednesday, March 14, 2018 6:42:04 PM

Dear DNR Personnel,

Please protect the Great Lakes by NOT allowing Foxconn to use the water from Lake Michigan. There are many concerns, some of which are:

Mount Pleasant is not in the Great Lakes Basin so Lake Michigan water would have to be diverted. This is not acceptable and according to the Great Lakes Accord is not allowed except in very rare cases and only to the public. Foxconn is a foreign private company not the public so does not qualifyand SHOULD NOT qualify.

The water used by the Great Lakes must be returned minus human consumption. Foxconn would not do this. 40% of the water used in the manufacturing process would be lost. This is disasterus on its own and could be made catastrophic if replicated.

The DNR needs to honor the Great Lakes Accord, protect our precious water resource, and in the process protect the public. We need safe drinking water now and in the future. Please look at the long term and say no to water diversion to Foxconn.

Sincerely,

Carol Johnstone
