To whom it may concern:

I would like to state my opposition to the water usage proposed by Foxcon. Our Great Lakes are a resource to be guarded and conserved not only for ourselves, but for future generations as well. Foxcon his a dismal environmental track record. Please don't allow them to do here what they have done at their other plants around the world. I would regard their water usage and their supposed environmental safeguards for the water returned to the lake as both unacceptable and a deal breaker.

Thank you

The Rev G Green
