The mere fact that Scott Walker and his cronie Republicans cannot see the impact of 700 million gallons of water being used daily to provide for Foxconn speaks for itself on the intelligence level of the Republican Party in Wissippi. This type of usage will impact villages and communities across Wisconsin. Wait until the rich elite in the Fox Valley and Green Bay can longer use the Great Lakes for their pleasure boating and fishing. When are the people of this once great state going to wake up? I'm no longer shocked at what is coming next. Trump is just more of the same. Good luck.
