As a citizen of WI and a resident within the watershed that deals with FoxConn, I can only state how unhappy and uncomfortable I am with this fast and loose approach to making sure that FoxConn has everything it needs to do environmental harm to our state for a profit!

Water is our planetary universal solvent. Harm to our watershed means harm to Lake MI. Harm to Lake MI means harm to the Great Lakes. Harm to the Great Lakes means harm to the entire fresh water supply.

WI must do the right thing! Protect our watershed and Great Lake from the pollution caused from FoxConn.
