I vehemently oppose the approval of 7 million gallons of water for the FoxComm plant. Lake Michigan cannot be sustained with the use of water for Milwaukee and Waukesha counties and now this use. Furthermore, it sets a precedent for future industrial use. FoxComm and DNR cannot guarantee 100% that the health of the lake will not worsen based on this use. I opposed the FoxComm project for multiple reasons and this HUGE water use and risk to Lake Michigan's health is a significant component of my opposition.
