Hello,
I oppose the City of Racine water diversion application. This application goes against the intent of the Great Lakes Compact: that the Great Lakes water belongs to the people of the region, not private corporations. This diversion application - which allows for a massive consumptive use by a private corporation - is unprecedented and irresponsible.

This compact was a bipartisan effort that helps ensure the integrity of our country's greatest freshwater resource: The Great Lakes hold 90% of American's freshwater, which is 20% of the world's supply. The compact keeps Great Lakes water safe from exploitation by companies like Foxconn. Do not allow this corporate misuse of our waters to happen. Honor the integrity of the compact and deny the application.

Thank you.
