To whom it may concern,

I am against the diversion of Lake Michigan water for the Foxconn factory, as well as allowing wetlands to be filled in by this project. The mission of the DNR used to be to protect the land, air and water for all and for future citizens to enjoy. Now, it's protect the campaign donors from any responsibility to the citizens of Wisconsin. Shameful.

If this gets approved, rubber stamped would be the better term, Wisconsin should be sued by other states in the compact.
