Dear Adam,

I am strongly opposed to any water diversion from Lake Michigan for Foxconn. In the coming years the Great Lakes Water Compact is going to be challenged again and again. Allowing an exemption for Foxconn will make it very tough to say No to any group wanting Great Lakes water.

It is bad enough that Wisconsin is giving $4billion to Foxconn and ignoring many environmental rules, now they want the state to encourage violation of the Great Lakes Compact. As Nancy Reagan used to say in circumstances that were much less appropriate, "**Just Say No**".
