To Whom it May Concern,

I am very worried about further diversion of water from the Great Lakes. This is not for individual use. A huge quantity of water will be needed for production of the items made by FoxCONN. We should not approve this use. The corporation should be forced to change water use habits to use what is currently available. We cannot continue to divert water fron the lakes. Behavior needs to change instead.

Thank you and please continue to protect our Great resource, the Great Lakes.
