I am not opposed to Foxconn building their facility in the Racine area. I **am** opposed to diverting Great Lakes water out of the Great Lakes basin for industrial purposes. We have a compact with all other Great Lake states as well as with the Canadians that we must honor. Once we set this dangerous precedent, we will open the flood gates for all kinds of diversions. Locate Foxconn within the Great Lakes Basin and most of the problem will be solved. And find out what types of contaminants will be in the Foxconn waste water! Don't let big money and big business rob Wisconsin of its greatest resource.
