Subject: FOXCON

Mr. Dick,

I have been a resident of Wisconsin for 62 years, my entire life. As a Milwaukee resident I have seen the clean up of the river down town and witnessed the positive affects on the city and environment. However I was very disappointed and outraged that Lake Michigan water was diverted beyond the Lake Michigan Basin to the suburbs. The amount of lawns that so much of the water will be used for is and was a criminal act. If there were provisions that water conservation was imposed such as in California I could have almost agreed but the constituents of Waukesha county who donate to Governor Walker getting special privileges is disgraceful.

Allowing Foxconn to pollute more of Wisconsin without any regulations is another criminal act perpetrated by the Governor and his Republican cronies. Wisconsin, once an example of clean water and regulated pollution controls, has essentially been turned into Eastern Europe Countries behind the old Berlin Wall that were polluted so bad simply by a government that raped and abused the land without regards to the people's health or the long term affects to the environment. To disregard the "science" and succumb to special interests who purchase the rights by bribing our government officials for the permission to abuse the land and ruin our water is not democracy. It is the most heinous moral crime that can be committed. We are leaving a legacy to our children of turning our state into a third world country exploited for it's natural resources than abandoned by corporations and governments.

Please do all you can to oppose the Foxconn illegal and abusive permission to destroy Wisconsin.

Regards.
