Subject:	OPPOSED. NO Great Lakes Water for Mount Pleasant
Date:	Thursday, February 01, 2018 11:54:18 PM

DNR,

Please don't approve sending water to Mount Pleasant. It drains into the Mississippi River basin. **That would violate the Great Lakes Compact.**

Southeastern Wisconsin has become the leader in Fresh Water Technology. It's been called the Silicon Valley of Fresh water. Good jobs are growing in this sector with more to come.

Lake Michigan contains 22% of the Fresh Water on Earth! It will become more important than oil. We can't afford to be short-sighted.

Sincerely,
Mrs. Carol Limbach
