Attachments:	racine diversion mass emailing.docx

Dear Mr. Freihoefer,
It was a pleasure to speak with you this morning on the telephone. Attached is my paper with respect to the above-referenced matter for review by the DNR. As you will see, I have written it for mass mailing purposes, and is in the form of a Word document. I cannot stress enough, the need for the DNR to retain an expert in the field of chemistry (and possibly even biology) to support and verify the information being learned by lay people, such as myself and those who attended the March 7 hearing. I can guarantee this matter will not end in this venue and it will be tried somewhere else, unless the truth is revealed on a mass scale. A large bank account is great, but how that money is derived is another matter altogether. I am tired of the corruption, and so are most everyone I speak with. Unless there exists proven technology to eliminate the toxins outlined in the attached paper, it is time to scrap the entire project and deny Racine's application. Thank you for your attention.

I encourage everyone who reads this email to share it far and wide. Please educate yourself and send an email to Mr. Freihoefer at the Wisconsin DNR, as well as your local, county, and state representatives. This is an issue that affects all of us, not just Wisconsin. Why is it important for you to do something? Yesterday, I spoke with a representative of the Great Lakes-St. Lawrence River Basin Water Resources Council as to what their position is regarding the Racine application. I was told the Council knew nothing about what was going on in Racine and had received no information whatsoever on the matter. This Council was created to protect the Great Lakes waters. Therefore, I emailed the Council what I have compiled in my own rudimentary way, as well as a link to the video of the March 7 hearing held in Sturtevant. So, if everyone would please take the time to at least send an email to Mr. Freihoefer, you are part of the solution to solve the problem. Why am I doing this? I am not a protestor or person looking for attention (**please do not email me, send an email to Mr. Freihoefer**). I am just an everyday regular person trying to make sense of things. Together we have the power to move mountains. Thank you.
