Wisconsin Department of Natural Resources,

My name is Kyra Trocke, and I am a 13 year old from the Village of Caledonia. I am asking you to withhold making your decision of whether or not to give Foxconn 7 million gallons a day of our lake water until you have thoroughly discussed with them how it is going to effect our lake and environment, and what they are going to do with the sludge produced by their manufacturing process.

You need to realize that this will not only severely effect our environment in a negative way, but you will also leave my generation to deal with it. I implore you to not only think about the effect it will have on our short-term economy, but also the long-term effect it will have on our precious great lakes, our Earth, and future generations. Please do not leave my generation with any more problems to solve for this already breaking-down environment.

Thank you for your time and consideration.

Kyra Trocke
