I am writing in opposition to the daily 7 million gallon water diversion of Lake Michigan.

To begin with, the Great Lakes are public waters not to be used for profit by Foxconn or any other private entity. Furthermore, Foxconn has a poor record on environmental safeguards.

This process should have been completed before Foxconn was approved for a startup company in Wisconsin. They are costing taxpayers billions of dollars in addition to using/jeopardizing a public trust - Lake Michigan. The DNR is the trustee of WI's lakes, rivers & wetlands. Please reject this proposal as the trustee of our natural resources.
