Please do not approve the water diversion for Foxconn.

Racine will use your majority of the water for a single, private, foreign entity, Foxconn.

This is a bad idea for all of Wisconsin.

Resources are to be conserved and not for sale to the highest bidder. I grew up in the 60s and enjoyed eating perch and smelt from Lake Michigan. Swimming was also great fun in the summer.

I have seen how industrial pollution has done irreparable harm to Lake Michigan. You need to not approve the diversion for Foxconn.

Thank you,

James Burch
