I urge the DNR not to approve the diversion of water resources that is being considered.
We've seen the disastrous consequences that inappropriate water resource planning can have on
both urban and agricultural areas. We simply can't afford to set precedent for misuse of the Great Lakes
fresh water supply. Do the forward-looking thing, do the right thing. Stop incursion into our fresh water supply
and develop better conservation and clean water options for the current situation.

Yours truly,

Linda Meadowcroft
