I strenuously oppose diversion of 10-15 million gallons of water per day from the Great Lakes for use by Foxconn, a foreign corporation, and exempting Foxconn from most environmental regulations designed to protect the environment. Foxconn plans to return only part of the water draw-down to the Great Lakes or aquifer.

I also strenuously object to diverting $4.8 Billion, and counting, of Wisconsin State and local taxpayer dollars to support Foxconn, which is a very profitable foreign corporation, whether directly or indirectly. Wisconsin State and municipal governments desperately need those funds for infrastructure throughout the state, not just in area needed by Foxconn; for education; for health care; for tax relief; and other needs.
