Subject: STOP THE FOX CONN WATER MISUSE
Date: Tuesday, March 13, 2018 11:12:36 AM

To Whom it May Concern;

I'm writing to add my voice to the many Wisconsinites who are appalled at the $4.5 billion dollar give away to the Fox Conn.

Given that the Village of Mt. Pleasant is not a public water utility, it has no rights to make a diversion request. Mt. Pleasant is a Great Lakes Basin "straddling community." The Great Lakes Compact states that the majority of the water used in a straddling community is for PUBLIC USE not corporate or business use. Just based on that alone the DNR application should be denied.

Additionally, Foxconn gave NO PRIOR INFORMATION on how the water will be treated on site or what chemicals and contaminants are used in their process. Why did the city of Racine even apply for the water diversion permit without knowing this? Moreover, there is no existing reliable treatment for nanoparticles.

If this permit is approved every straddling community anywhere along the Great Lakes Basin twill want to allow corporations to get water. This is exactly why the Great Lakes Compact was written. There would no longer be any legal recourse to stop the water use rush.

Please make sure out water is protected.
