To whom it may concern,
Please do not approve this diversion. The water of the Great Lakes is supposed to go to residents around the lakes. This is a company that will draw a significant amount of water from this reserve. Please consider not allowing this to move forward as it can have dangerous consequences with water becoming more scarce around the globe. I urge you to reconsider this application and to not allow it to go through. I understand that economics is important but nothing should come before clean water and clean air.
Sincerely,
B. Kengor
Ohio Resident for the protection of our lake waters.
