To whom it may concern:

For the love of future generations that will inhabit this land & water, for the children of Wisconsin - **DO NOT approve Foxconn's application to divert a daily 7 million gallons of Lake Michigan Water to their plant.** This will have an adverse effect on the local environment immediately and will cause future issues that many generations to come will have to deal with. I plead someone who reads this has a conscience that can make a difference.

Thanks,
Dan Dudzinski
