Subject:	diverting Lake MIchigan water Foxconn
Date:	Wednesday, March 07, 2018 2:51:08 PM

Dear DNR Racine Diversion Committee,
I am writing to express my strong opposition to allow Foxconn to take Lake Michigan water. There are extreme environmental concerns for the long term with this plan. The plant should not be built in an area without water at their own location. Lake Michigan is not the savior for Foxconn. Lake Michigan is our precious resource, an incredibly important Great Lake among the Great Lakes. This will end up in litigation because it is going to effect more than Wisconsin and the use of Lake Michigan waters is not a gift to Foxconn, just because they demand the right to take the water.
The proposal to pump back water into the Lake is very problematic and the long term unforeseen damage this will cause. It is not a solution that can be considered for their request to use the water and return part of it. This is not good for our state and for future generations.

Please DENY the permits for Foxconn to take water from Lake Michigan.

Sincerely,
Brandi Browskowski-Durow
Lake Mills, WI 53551
