Please do not jeopardize our Great Lakes by allowing Foxconn (a business —not one of our citizens) to take water for their use.

The Great Lakes are a treasure shared by the states & provinces that adjoin them. In years to come their value will be even greater to we citizens. Do not let someone's short term gain destroy the very long term value for all of us.

Some countries & even US stares are dealing with water shortages now. The future will show us what a wonderful gift these bodies of water are & we hope they are still protected !

Thank you for giving this your careful attention & thinking of your grandchildren-& their grandchildren as you decide how these Lakes
Will be treated— with care & protection or letting business interests over rule their importance to all.

Sincerely

Pat & chuck Olsen
