Hello DNR Racine Diversion Committee
Foxconn isn't in the Great Lakes Basin. It shouldn't quality for a diversion. This shouldn't have even been allowed.

The water delivered to Mt. Pleasant will not be diverted for public consumption as required by the Great Lakes Compact. This is not OK.

Nearly 40% of the 7 million gallons will be lost to the manufacturing process and not returned to the lake. This is not OK! Please don't let it be ok!

There is no specificity about how the water will be used, treated or managed. This is not OK!

None of this is OK! How can you allow this?

Please don't let Foxconn get away with a con in Wisconsin, towards our water, towards our health, towards Lake Michigan and towards our water table.

And please don't make the taxpayers pay for pollution they cause.

Thank you for this opportunity to speak.
