February 10, 20l8.

To whom this may concern;

Adding wastewater either across or through the Pike Creek Basin to Lake Michigan, plus the already approved Waukesha wastewater into the Root River is just too much for either the engineers, the environment, the lake, or the City of Racine to handle.

7 million additional gallons/day of clean Racine water used is also too much.
Foxconn
should be required to build new wastewater and clean water treatment facilities for Racine before any project of this magnitude should even begin to be considered.

Thank you for your consideration.

Cordially,
Phil Schultz
1032 College Ave., Apt. LF,
Racine, Wis. 53403-1476
262/637-4353
ps please see attachment for a little perspectrive on the matter. Thanks again.
