Section 2: Project Information Required for all Projects

Project Title F2 Jct. 18 Perched Pipe to F2A 2025					Current Funded Miles 68.35	New Miles (if applicable)
County Florence	Township 40 N	Range 18	Section 32	¼ ¼ SW	¼ SW	GPS Coordinates: Lat. 45.895563 Long. -88.277231

Project Description Summary

Florence County would like to rehab a 3700' section of trail F2 from Jct.18 (45.895563,-88.277231) south to trail F2A (45.888386,-88.276096). This project includes resetting an existing culvert (45.892559,-88.279542), rip-rap the inlet side and reposition existing rock around the outlet. The culvert serves as a run off for an intermittent stream that floods the inlet side and tops the trail. The trail surface has worn away over the last 20+ years since it was developed and now needs new material to restore it to manageable condition. There are sandy portions in need of new base and wear material in addition to ditching and run outs to control water shed. The placement of 6" of ore (320 yards) for base and 6" of gravel (960 yards) to cap the entire surface. This is a high traffic, year round, dual use trail system that serves as a primary connection for trail riders who want to patronize the ATV/UTV friendly campgrounds located at Lake Emily or in Keyes Lake. In addition to beautiful parks, recreational areas, and eating establishments this area is considered a favorite amongst trail users. We are asking for 80% (\$18075.58) funding from the ATV-UTV Program and the remaining 20% (\$4518.89) from the Snowmobile Program as this does provide a benefit to this dual use trail.

I certify that all maintenance land use agreements are on file.

Trail Project Detailed Description

Florence County would like to rehab a 3700' section of trail F2 from Jct. 18 (45.895563,-88.277231) south to trail F2A (45.888386,-88.276096). This project includes resetting an existing culvert (45.892559,-88.279542), rip-rap the inlet side and reposition existing rock around the outlet. The culvert serves as a run off drain for an intermittent stream that fills up, floods, and occasionally tops the trail. The trail surface has worn away into the base material over the last 20+ years since it was developed and now needs new material to restore it to manageable condition. There are some sandy portions that need new base and wear surface, in addition to ditching, and run outs to control water shed. The placement of 6" of iron ore (320 yards) for a base along with 6" of gravel (960 yards) to cap the entire surface will provide a long lasting section of trail. This is a high traffic, year round, dual use trail system that serves as a primary connection for trail riders who want to patronize the ATV/UTV friendly campgrounds located at Lake Emily or in Keyes Lake. In addition to beautiful parks, recreational areas, and eating establishments this area is considered a favorite amongst trail users. We are asking for 80% (\$18075.58) funding from the ATV-UTV Program and the remaining 20% (\$4518.89) from the Snowmobile Program as this does provide a benefit to this dual use trail.
