#### **Project Description Summary**

Vilas County is proposing to remove the current Lynx Creek Bridge and replace it with 2-4'x20' culverts. this project is on Corridor Trail 6 and is maintained by the Presque Isle/Winchester Sno-Bunnies. The trail is on private property and the club is working on a long term agreement. This trail and bridge has been in the trail system since 1974 and the club has rebuilt it once in 2003. There is no weight rating for this bridge currently. During the bridge inspection, the firm stated that it is undersized for its use. Corespondence and bridge inspection are included in the granr request.

#### **Bridge Project Detailed Description**

The project consist of removal and disposal of the current bridge. Erosion control measures will be implemented. Two 4'x20' culverts will be placed into the creek at the crossing. E-mat and rip rap will be installed as well as pit run and a graveled topp course compacted to help reduce any erosion. Side slopes will be seed with grass if needed.

#### **Guidelines for Applicant**

Complete this form for each bridge structure you are submitting a grant application for. Provide any additional documents not requested on application checklist to substantiate your points, including actual deeded easements.

Category	Possible Points	Actual Points
1 Condition of the Structure (max of 10 points)		
Has a certified bridge inspection report that supports the project & demonstrates need (see	10	10
example, must provide copy of report by August 1 for 2024 only)	10	
2 Permits (maximum points 4)		
Consultation with DNR Water Mgmt Specialist has occurred & permit is likely, if needed	1	1
Permit in hand / Bridge already permitted	3	
3 Funding (maximum points 2) Are other funds already committed?		
50% or greater from other funding source(s)?	2	
11% - 49% from other funding source(s)?	1	
4 Length of Written Easements or Land Use Agreement (max points 5)(ch.		
23.09(26)(am)1 WI Stats)		
On public land (County, State, Federal)	5	
10 or more year deeded easement on private land or other public land, for all portions of	5	<u> </u>
that trail to the nearest road on each side of the bridge		
3-9 year deeded easement on private land or other public land, for all portions of that	4	
trail to the nearest road on each side of the bridge		
10 or more year <b>deeded easement</b> on private land or other public land, for just the bridge	3	
site		
3-9 deeded easement on private land or other public land, for just the bridge site	2	
10 or more year land use agreement (LUA, not deeded) on private land or other public	1	
land		
3-9 year land use agreement (LUA, not deeded) on private land or other public land	0	0
5 Miles Impacted – How many miles will need to rerouted if the structure is not replaced?		
Measured from nearest intersection on both sides of the bridge. (max 4 points)		
Less than 20 miles	1	
20 miles or more	3	3
No other snowmobile trails connect. Explain:	4	
DEDUCTIONS		
6 County Active Project Deduction (maximum deduction 1 point) A snowmobile active		
project is one that has exceeded it's initial grant period.		
Two or more active projects - deduct 1 point	-1	XXX

### Bridge Inspection Report

#### **General Information**

The structure in this report was inspected by certified Wisconsin Department of Transportation Bridge Inspectors. Patrick Hampston, P.E. is a Bridge Inspection Team Leader and NSTM certified inspector.

The bridge was inspected with trail use in mind, using normal vehicle bridge standard to determine the condition of the structure.

All recommendations made in the report are also considering the use of the trail. Trail bridges in general should have a load rating considering all the possible uses of the structure. Even though the bridges may be just for snowmobiles, several types of vehicles may use the structure.

KBIS, recommends as a minimum that bridge owners load rate all the structures in their inventory and post a single ton sign at each bridge. It is a "insurance" policy for the owner if the bridge is damaged by a user that should not be using the structure. Also, grooming/trail equipment is getting large every year, so bridges again should be rated.

#### Location information/General Description:

Lat and Long: 46.225130, -89684375

#### **Bridge Condition**

Length 26', Width 11', Clearance 3-4'

Timber wearing surface, 1 board is loose and coming up. Some areas covered in soil / vegetation. Fair.

Railing and Posts are checked and have some black mold. Fair.

Deck is 4"x8" transverse planks, some decay, widespread green mold on underside. Fair.

3 Steel girders, surface rust, welded splice near east 1/4 point of north girder. Fair.

Concrete footings, scaling present and moderate spalling on west footing. Large crack in east sill. East sill undermined up to 12" deep at south end. NW corner is sinking and putting a twist in the bridge. Poor condition.

Approaches have a 3' x 3' hole in SE corner, 1' x 1' hole in SW corner, approaches are 6-12" higher than bridge. Poor condition.

Object markers, All for have map cracking Fair. 1 bridge ahead sign, West missing, East Good.

Channel has logs / debris under bridge, fair.

## Bridge Inspection Report

### **Report Summary**

#### NBI Ratings: 9-7 Good, 6-5 Fair, 4-3 Poor, 2-1 Critical, 0-Closed

Deck # 6 Superstructure # 6 Substructure # 4 Channel # 5

Overall Condition

Poor

#### Recommendations/Maintenance Items:

\*\*\*\*\*High importance-Monitor the sinking NW corner of the abutment.

Clean the sills off.

\*\*\*\*\*High importance-Consider a load rating for base line. 3 girder system and the girders appear undersized and insufficient quantity.

Clean the deck.

Brush around bridge.

Fill sinkholes / erosion in approaches.

Replace west bridge ahead sign.

Level footings and add riprap to both abutments.
