Project Description Summary

Burnett County is requesting funding for a bridge rehabilitation project on Snowmobile/Winter ATV Corridor Trail 45 in western Burnett County. The North Fork Flowage bridge was installed in 2004, is 40' x 12', and rated for 12,000 pounds. The bridge was placed on existing abutments in 2004, and the age of them is unknown. The abutments are now starting to fail, and erosion is occurring around them. We propose replacing this bridge with a new, 60' bridge on new abutments. The longer length is a better option for this site, and combined with new abutments will resolve the erosion issues that are currently occurring. This segment of Trail 45 runs through Crex Meadows State Wildlife Area and is an important corridor connecting Grantsburg to Danbury.

Bridge Project Detailed Description

Burnett County is requesting funding for a bridge rehabilitation project on Snowmobile/Winter ATV Corridor Trail 45 in western Burnett County. The North Fork Flowage bridge was installed in 2004, is 40' x 12', and rated for 12,000 pounds. The bridge was placed on existing abutments in 2004, and the age of them is unknown. The abutments are now starting to fail, and erosion is occurring around them. We propose replacing this bridge with a new, 60' bridge on new abutments. The longer length is a better option for this site, and combined with new abutments will resolve the erosion issues that are currently occurring. Rehabilitation of the bridge has been requested by the DNR Property Manager and the snowmobile club. This segment of Trail 45 runs through Crex Meadows State Wildlife Area and is an important corridor connecting Grantsburg to Danbury.

Hi Susan,

Sorry I didn't get back to you sooner. To remove the existing bridge and abutments, disposing of the abutment material and hauling the bridge back to your shop at 8150 State Rd 70, Siren? \$ 2,000.00 is what I am estimating

Thank you

To: Tollander, Susan
Subject: RE: Request for Bridge Estimates

If we were to do all the demolition and disposal as part of installing a new bridge, we would add \$5,000 to the project.

If we were to do all the demolition and disposal as a stand-alone project, the cost would be \$15,000.

Let me know if you need anything else.

Cc: Ashley Anderson <ashley@andersonbridges.com>

Subject: RE: Request for Bridge Estimates

Susie,

I think Ashley may have gotten some projects mixed up when we did the North Fork Flowage. He asked me to revise that proposal to a 60' bridge so that he can extend the bridge 10' beyond the failing abutments on each side. I've attached the 60' budget proposal here. He is not interested in quoting the rehabilitation of this bridge due to the site conditions.

For the Whiskey Creek bridge, I have attached a proposal for the rehabilitation as requested.

Please feel free to contact Ashley if you need to discuss further (715-210-6920).

Subject: RE: Request for Bridge Estimates

Hi Kory,

I would also like to request another estimate for the North Fork Flowage bridge. Will you please send an estimate to keep the existing bridge, but increase the load rating to 25,000 lbs, replace the deck, and complete necessary repair work to the abutments/pilings?

Thank you,

Susie
