Bridge Project Detailed Description

Clark County is applying for a culvert installation project on a funded Chippewa County trail that runs into Clark Co. on corridor 27 in the town of Worden, Clark Co. The old crossing was navigable as an ice crossing in the past but with more water running now that is now longer the case. The named stream Roger creek runs year round now. This project is proposed new culvert installation on snowmobile trail corridor 27 in the town of Worden in Clark County. This trail is maintained by a Chippewa Co. snowmobile club but this section of trail runs through Clark Co. The project site is on private property owned by Curvin Brubacher, W12074 Cty Rd N, Stanley, WI 54768. Lat: 44.93658 N, Lon: 90.91977 W

The proposed culvert would be installed on named Roger Creek. The trail has been at this location for decades and was an ice crossing in the past. However, the channel for the stream has widened over the years and water runs year round without freezing. This makes for a dangerous crossing for riders and groomers.

The proposed culvert will be approx, depending on estimate, 63x87x40ft elliptical steel culvert. Contractors would haul in 6-18inch riprap rock to place around the culvert and each side of the culvert. Then top with small rock to be able to drive over. Estimated material is 90 yards of 6-18in rock, 15 yards of 2 inch ballast for top rock.
