#### **Bridge Project Detailed Description**

This project is proposed new culvert installation on snowmobile trail corridor 27 in the town of Worden in Clark County. This trail is maintained by a Chippewa Co. snowmobile club but this section of trail runs through Clark Co. The project site is on private property owned by Curvin Brubacher, W12074 Cty Rd N, Stanley, WI 54768.

The proposed culvert would be installed on named Roger Creek. The trail has been at this location for decades and was an ice crossing in the past. However, the channel for the stream has widened over the years and water runs year round without freezing. This makes for a dangerous crossing for riders and groomers.

The proposed culvert will be 63x87x40ft elliptical steel culvert. Contractors would haul in 6-18inch riprap rock to place around the culvert and each side of the culvert. Then top with small rock to be able to drive over. Estimated material is 90 yards of 6-18in rock, 15 yards of 2 inch ballast for top rock.

If necessary, temporary silt fencing can be installed on the downstream side. There will not be any materials that need to be disposed. This is a mapped wetland area and flood plain and the total work are impacted is about 1,244 square ft. We are still waiting on further information from the water management specialist.

This is the second year this culvert project has been applied for. Estimates are lower this year. Estimate 1 is at \$13,400 and estimate 2 is at \$13,706.
