

PROJECT ELIGIBILITY & CATEGORY SELECTION

Where does the source of pollution stem from?

At least 50%
Agricultural

POINT SOURCE

CAFO Production Site or Cropland, Adaptive Management/WQ Trade, NR 216 requirement

NONPOINT SOURCE

Not CAFO Production Site or Cropland, Not part of Adaptive Management Plan, Not part of WQ Trade, Not NR 216 requirement

Not eligible

TMDL

Implementing NPS pollutant-specific goals in TMDL report

Non-TMDL

Not implementing NPS pollutant-specific goals in TMDL report

Addressing NR 151 Performance Standard or Prohibition AND is existing non-compliance AND meeting TMDL Goal

Going above and beyond a Performance Standard or Prohibition AND meeting TMDL Goal

Addressing a pollutant source for which there is no NR 151 Performance Standard or Prohibition AND meeting TMDL Goal

Existing Non-Compliance with NR 151 Performance Standards or Prohibitions

New NR 151 Non-Compliance or pollutant source for which no performance standard

Small-Scale or Large-Scale Ag TRM

Not Eligible

Note: For project sites that include new and existing noncompliance, the new noncompliance will be prorated out.

PROJECT ELIGIBILITY & CATEGORY SELECTION

Where does the source of pollution stem from?

At least 50%
Non-Agricultural

POINT SOURCE

Project to meet WPDES permit compliance?

NONPOINT SOURCE

Project not to meet WPDES permit compliance?

Project to meet
Adaptive
Management
goals/WQ Trade

Project to meet NR 216 MS4 permit compliance

Project not to meet NR 216 MS4 permit compliance AND not to meet Adaptive
Management goals/WQ Trade

Not
eligible

Not
Urban
Area per
NR 155

Urban Area – per NR 155

Will be
Urban Area
within 20
years
