DNR Seeking Public Comment For Environmental Review Of City Of Milwaukee Safe Drinking Water Loan Program Project

MADISON, Wis. – The Wisconsin Department of Natural Resources (DNR) today announced it is seeking public comment on the Safe Drinking Water Loan Program's environmental review determination of the City of Milwaukee project.

The project includes watermain replacements on West Casper Street, North 78th Street, West Acacia Street, East Linus Street, East Potter Avenue, East Falling Health Place, West Green Tree Road, North 90th Street, North 87th Street, North 75th Street, North 52nd Street, West Sheridan Avenue, North 100th Street, North 98th Street, West Olive Street, North Colgate Circle, North 83rd Street, West Fiebrantz Avenue, and North Dousman Street to improve its public drinking water system.

Activities related to this project are minor actions under chapter NR 150, Wis. Adm. Code, for which no environmental analysis is required; an environmental review must be conducted under [40 CFR 35.3580](#) before funding this project.

The City of Milwaukee submitted with its financial assistance application the information and materials required to conduct a National Environmental Policy Act (NEPA)-like environmental review of the potential environmental impacts of the project and related activities.

The Safe Drinking Water Loan Program has determined that the project will not result in significant adverse environmental effects, and no further environmental review or analysis is needed before proceeding with funding the project.

The public is encouraged to submit comments regarding this decision and the potential environmental impacts of this project. Submit comments by Nov. 4, 2025, to:

DNRCFELEnvironmentalReview@wisconsin.gov

Based on the comments received, the Safe Drinking Water Loan Program may prepare an environmental analysis before proceeding with the funding process. The analysis would summarize the DNR's consideration of the project's impacts and reasonable alternatives.
