

RR Program Update

Brownfield Study Group Meeting
February 9, 2018

Clean Fill Update

Clean Fill Update

- Initial WMM version put out for comment and final approval was not obtained
- New RR version currently under review.
- Identifies use for RR Response Action sites

Clean Fill Update

Includes same contaminant criteria:

- No non-naturally occurring compounds (VOCs, PCBs, Pesticides, etc.)
- PAHs less than Non Industrial Direct Contact RCL and less than GW RCL
- Naturally occurring compounds, including metals less than USGS background threshold value and/or NonIndustrial/GW RCLs

Clean Fill Update

Guidance includes information on
