ENVIRONMENT

Subject:
Soil Vapor Extraction (SVE) System Progress Report, September 2015 through February 2015, Madison-Kipp Corporation (MKC) Site, 201 Waubesa Street, Madison, Wisconsin.

Date:
March 30, 2015

Dear Ms. Hanefeld:

On behalf of MKC, this progress report provides a summary of the SVE system monitoring completed as part of the MKC site located at 201 Waubesa Street in Madison, Wisconsin. As presented in the *2013 Annual Report* dated March 31, 2014, the SVE Progress Reports will continue to be submitted to the Wisconsin Department of Natural Resources (WDNR) on a semi-annual basis. This SVE Progress Report provides a summary of tasks completed during the period of September 1, 2014 through February 28, 2015.

Tasks Completed – September 1, 2014 through February 28, 2015

During the reporting period, SVE system Operation, Maintenance and Monitoring (OM&M) was performed by ARCADIS and/or MKC personnel each week. All water generated during SVE maintenance activities was incorporated by MKC with the facility process water on site. Monthly SVE OM&M was performed by MKC personnel September 17, October 16, November 12 and December 16, 2014, January 22 and February 20, 2015. Laboratory analytical data collected during the monthly OM&M events is included in Table 1. Field data collected during the OM&M events is included in Table 2. The air emission tables are also included as Tables 3 through 7. A review of the air emission tables indicates the emissions rates are several orders of magnitude lower than the Wisconsin Administrative Code NR445 Emission Threshold Values.

Tasks In-Progress

The following tasks are scheduled to be completed from March 1, 2015 through August 31, 2015.

- Weekly and monthly SVE system OM&M activities. The OM&M activities and data collected will be used to optimize system operation and evaluate the future operation of the SVE system.

If you have any questions or require any additional information, please contact us at 414.276.7742.

Sincerely,

ARCADIS U.S., Inc.

Christopher D. Kubacki, PE
Senior Engineer

Jennine L. Trask, PE
Project Manager

General Notes:

Only detected constituents are noted. Constituent concentrations are reported as ppbv.

Between March 9 and October 16, 2012, the system operated with the dilution air valve 50% open to maintain system operation within maximum range of blower vacuum. On October 16, 2012, the blower was replaced and modified to allow more efficient system performance and operation with the dilution air valve fully closed.

Influent sampling began on 3/16/2012 to evaluate the effectiveness of carbon treatment.

System sampling occurred daily for the first 3 days of startup, weekly for the next 3 weeks, and monthly thereafter.

Interim system was shut down 4/29/2013. The permanent SVE system was started 5/13/2013.

Acronyms and Abbreviations:

< = Constituent not detected above noted laboratory detection limit.

-- = Not monitored or sampled.

B = Compound was found in the blank and sample.

Bold = Constituent detected above laboratory detection limit.

J = Constituent concentration is an approximate value.

ppbv = Parts per billion by volume.

General Notes:

Only detected constituents are noted. Constituent concentrations are reported as ppbv.

Between March 9 and October 16, 2012, the system operated with the dilution air valve 50% open to maintain system operation within maximum range of blower vacuum. On October 16, 2012, the blower was replaced and modified to allow more efficient system performance and operation with the dilution air valve fully closed.

Influent sampling began on 3/16/2012 to evaluate the effectiveness of carbon treatment.

System sampling occurred daily for the first 3 days of startup, weekly for the next 3 weeks, and monthly thereafter.

Interim system was shut down 4/29/2013. The permanent SVE system was started 5/13/2013.

Acronyms and Abbreviations:

< = Constituent not detected above noted laboratory detection limit.

-- = Not monitored or sampled.

B = Compound was found in the blank and sample.

Bold = Constituent detected above laboratory detection limit.

J = Constituent concentration is an approximate value.

ppbv = Parts per billion by volume.

Table 2
Extraction Well Manifold Monitoring Data

Soil Vapor Extraction System Progress Report
Madison-Kipp Corporation
Madison, Wisconsin

Well ID	Date	System Manifold		
		Vacuum (in H ₂ O)	Flow Rate (cfm)	VOCs (ppm)
SVE-9	01/30/15	-6.8	34.9	--
SVE-9	02/05/15	-13.6	35.1	--
SVE-9	02/13/15	-54.4	46.5	--
SVE-9	02/20/15	-27.2	0	--

General Notes:

Start system at 1:15 pm on March 9, 2012.

Vacuum measured with inline vacuum gauge in units of in Hg. Vacuum converted to in H₂O for comparison.

Extraction well flow rate measured with inline air flow meter.

VOCs measured with a PID (calibrated to 100 ppm isobutylene).

System flow and vacuum variable due to freezing conditions at the influent lines starting 1/7/2013. System flow balanced by opening make-up air valve.

Interim system was shut down 4/29/2013. The permanent SVE system was started 5/13/2013.

Initial permanent system readings recorded 5/14/2013 after optimization.

Acronyms and Abbreviations:

¹ = Vacuum measured at well head at 12:55 pm.

² = Vacuum measured at well head at 5:30 pm.

³ = System restarted with make-up air valve open 100 percent to reduce backpressure on blower.

⁴ = Make-up air valve closed to 50% open to continue operation of system consistent with previous settings.

⁵ = Vacuum measured at well head indicates influence is still being achieved at this well.

⁶ = PID results were analyzed from tedlar bag approximately 4 hours after collection due to instrument malfunction.

⁷ = Gauge reading above calibrated range.

-- = Not monitored.

cfm = Cubic feet per minute.

in Hg = Inches of mercury.

in H₂O = Inches of water column.

NM = Not measured.

PID = Photoionization detector.

ppm = Parts per million.

VOCs = Volatile organic compounds reported as isobutylene.

Notes on Page 2.

Table 3
Estimate of Post-Carbon Emissions

Soil Vapor Extraction System Progress Report
Madison-Kipp Corporation
Madison, Wisconsin

General Notes:

¹ = Total VOC concentration was based on the sum of all detected analyte concentrations in post-carbon effluent samples for dates shown. When compounds are not detected above the laboratory reporting limit, emissions are calculated using 1/2 the reporting limit.

² = Emission rates were determined using the following equation:

$$\text{Emission Rate} = \text{Conc.} * \text{Flow Rate} * 60 \text{ min/hr} * (1 \text{ m}^3/35.31 \text{ ft}^3) * (1 \text{ lb}/4.54 \times 10^8 \mu\text{g})$$

³ = SVE system began operation on 3/9/2012.

⁴ = System flow rate optimized 10/16/2012 by closing make-up air valve.

Interim system was shut down 4/29/2013. The permanent system was started 5/13/2013.

The initial permanent system sample was collected 5/14/2013 after system optimization.

Acronyms and Abbreviations:

cfm = Cubic feet per minute.

lb/hr = Pounds per hour.

$\mu\text{g}/\text{m}^3$ = Micrograms per cubic meter.

VOCs = Volatile organic compound.

Average Emission Rate = 3.30E-04 lb/hr

NR 445 Emission Threshold = 166 lb/hr

Notes on Page 2.

Table 6
Estimate of Post-Carbon Emissions of Cis-1,2-Dichloroethene

Soil Vapor Extraction System Progress Report
Madison-Kipp Corporation
Madison, Wisconsin

General Notes:

¹ = VOC concentration was based on the detected analyte concentration in post-carbon effluent samples for dates shown. When compound was not detected above the laboratory reporting limit, emissions were calculated using 1/2 the reporting limit.

² = Emission rates were determined using the following equation:

$$\text{Emission Rate} = \text{Conc.} * \text{Flow Rate} * 60 \text{ min/hr} * (1 \text{ m}^3/35.31 \text{ ft}^3) * (1 \text{ lb}/4.54 \times 10^8 \mu\text{g})$$

³ = Post-carbon emissions presented as a percentage of the threshold level using the following equation:

$$\text{Percent of Threshold} = (\text{Emission rate} / \text{NR 445 Emission Threshold}) * 100$$

⁴ = System flow rate optimized 10/16/2012 by closing make-up air valve.

System flow variable due to freezing conditions at the influent lines starting 1/7/2013. System flow balanced by opening make-up air valve.

Interim system was shut down 4/29/2013. The permanent system was started 5/13/2013.

The initial permanent system sample was collected 5/14/2013 after system optimization.

Acronyms and Abbreviations:

lb/hr = Pounds per year.

lb/hr = Pounds per hour.

µg/m³ = Micrograms per cubic meter.

VC = Vinyl Chloride.
