

Lead Service Line Replacement Community Outreach Grant

\$7 million of outreach funding is now available to eligible municipal community public water systems with *ongoing* or *upcoming* lead service line (LSL) replacement projects.

GRANT CRITERIA

- Applicants must be employees of eligible municipal community public water systems or authorized to act on their behalf.
- Projects must include community outreach or education to residents served by the municipal community public water system replacing lead service lines.
- This grant does not pay for lead service line replacement or any construction costs.

EDUCATION AND OUTREACH

ACTIVITY EXAMPLES

- Educate impacted community members about the LSL replacement project.
- Promote cooperation with customers who may have private LSLs eligible for replacement.
- Inform customers of public health information about LSLs and actions to protect health before, during or after the LSL replacement.

GRANT DETAILS

- Grantees can contract with community based organizations or other third parties to conduct community outreach activities.
- Maximum award amount is capped at \$150,000 per municipal community public water system.
- No cost sharing is required.
- Applications will be accepted through April 30, 2026 or until funds are exhausted, whichever comes first.
