The primary objectives of ch. NR 811, Wis. Adm. Code, revisions are to correct, clarify and update design and construction standards and address new technologies related to community drinking water systems.

The department is hosting various stakeholder meetings to provide consultants, water systems, and other affected parties the opportunity to provide input and suggestions for revisions to ch. NR 811, Wis. Adm. Code before the department begins drafting proposed rule language.

I. Introduction, led by Cathrine Wunderlich, WDNR Public Water Engineering Section Chief

II. Meeting kickoff

III. Discussion on Subchapter III – Source Water Development – Surface Water (s. NR 811.21 - 811.232, Wis. Adm. Code)
   a. General requirements including water quality and quantity design requirements.
   b. Intakes including separation from contamination sources and design requirements.
   c. Shore wells including separation from other utilities and contamination sources and design requirements.
   d. Off-stream raw water storage including separation from contamination sources and design requirements.
   e. Intake chemical treatment including design and redundancy requirements.

IV. Department identified areas requiring update in Subchapter III

V. Next Steps and timeline
   a. Rulemaking timeline and updates can be found at https://dnr.wisconsin.gov/topic/DrinkingWater/nr811.html
   b. Next Stakeholder Meeting Scheduled for November 2021 (Subchapter IV - Pumping Stations, Pumphouses and Water Treatment Plant Buildings and Subchapter V - Pumping Equipment and Appurtenances)
