

2006 - 2007 Brule Steelhead Run

The graph above shows the 2006-2007 steelhead passage at the Brule River lamprey barrier/fishway. A combined fall and spring total of 8,872 steelhead ascended, which included 8,162 wild fish and 710 fin-clipped hatchery fish. Peak movement occurred during the last week of September in the fall and the last week of March in the spring.

	FALL	SPRING	TOTAL	STOCKED PORTION
2000-01	4463	924*	5387*	839*
2001-02	5484	1124	6608	1118
2002-03	7448	2035	9483	1985
2003-04	8251	1997	10248	2026
2004-05	7635	1445	9080	1698
2005-06	9260	990	10250	1491
2006-07	7290	1582	8872	710

* represents an incomplete total due to spring 2001 flood
